Pete Cosgrove (Custodian of Records),

I called the MDNR Solid Waste Program to ask for information regarding the Bridgeton Sanitary Landfill in the St. Louis area and was referred to you. I am the technical assistance provider to the Westlake Landfill Community Advisory Group (CAG) through the EPA funded Technical Assistance Services for Communities (TASC). The CAG has asked me for information regarding if/when/how the sludge from the Bridgeton leachate treatment plant is tested for radionuclides. I couldn't find any information about leachate or wastewater treatment sludge testing on the MDNR website for the Bridgeton Landfill. Therefore, I am writing to ask for assistance in locating this information, if it exists. A second part to this inquiry is whether there is any mechanism for community members to request that the wastewater treatment sludge be tested for radionuclides, if testing is not already occurring.

I appreciate any assistance that you can give.
